*"THE **CONSCIENTIOGRAM** WAS WRITTEN TO SIMULTANEOUSLY UNITE STUDIES OF THE BOOK AND THE CONSCIOUSNESS, BOTH BEING COMPLEX AND OF HIGH EVOLUTIONARY MEANING".*

(Vieira, 2014, p. 406)

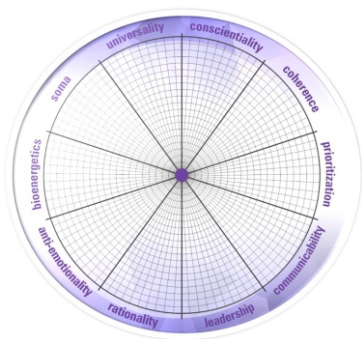

The course is composed of 26 classes, arranged as follows:

- » The 1st and 2nd classes explain the system and techniques techniques used, and the Conscientiogram, aiming to provide a general overview of the course and a baseline of knowledge for the course.
- » The last 4 classes are dedicated to interpreting the graphs generated from marks obtained for Conscientiogram items.
- » In the remaining classes, instructors answer doubts and clarify requests from students and an evaluation sheet is analysed, which are different for each edition of the course.

The analysis and discussion of the evaluation sheets aims for self-conscientiometric quality.

We work with the philosophy of deepening and expanding the approaches of self-conscientiometry.

When discussing certain issues, we seek to broaden the overall vision, give information and provide conditions for students to acquire autonomy and answer other questions with confidence and in depth.

The same question allows us to observe different and complementary perspectives allowing attainment of a broad vision.

At the end of the course, after having answered the 2,000 items, the student can generate a conscientiometric graph (360° of the consciousness) and receive guidance from instructors in its interpretation.

In this way, realization of correlations on the various themes of self-research are favored, expanding the understanding of oneself as a polyhedral consciousness.

**"EVALUATION THROUGH THE CONSCIENTIOGRAM
SURPASSES THE CONSCIOUSNESS AND REACHES THINGS,
HOLOTHOSENES, FACTS AND PARAFACTS".**
