EXTRAPHYSICAL REURBANIZATION IN
PRACTICE:
Conscienciocentric Campus Installation

Alexandre Martins Balthazar
reurbanize@gmail.com

Goals

- **Demystifying the Reurbex Study**
- **Correlating campus installation, penta and reurbex**

Connecting Researchers.

Contents

- **Bases of Parareurbanology**
- **Reurbex Indicators**
- **The role of Advanced Grouping**
- **The role of Penta**
- **The role of a Conscienciocentric Campus**

Connecting Researchers.

PRINCIPLE OF DISBELIEF

**DO NOT BELIEVE ANYTHING
YOU READ OR HEAR ON THIS CONFERENCE.
EXPERIMENT.
HAVE YOUR OWN EXPERIENCES.**

Conscienciocentric Campus Installation

- **Why another campus? For What?**

Conscienciocentric Campus Installation

Connecting Researchers.

Should campuses have a Conscientiology specialty or be an "embassy" of several CIs?

Intraphysical Reurbanization

Connecting Researchers.

“It is the act, process or effect of urbanizing again or redeveloping, expanding or reorganizing urban, rurban and rural areas, improving the conditions of human life.” (W.V.)

Experiences in CCCI:

CEAEC Campus (Cognópolis Foz) for 5 years

ARACÊ Campus for 7 years

Discernimentum Campus for 5 years

Campus Assinvéxis for 4 years

Extraphysical Reurbanization - Reurbex

Reurbex is the best change of environments and extraphysical communities, anticosmoethical degraded, sponsored by the Serenissimus, with the purpose of sanitizing the intraphysical holothosene of the areas of the Intraphysical societies on which they exerts antievolutionary and deleterious influence for the humanity

Extraphysical Reurbanization - Reurbex

**THE PURPOSE OF CONSCIENTOLOGY IS THE
PLANETARY TRANSFORMATION:**

Hospital – School ↔ **School - Hospital**

**"Reurbex is the beginning, the middle and the
end of everything we do here" W.V.**

Parareurbanology

The parareurbanology is the specialty of the Conscientiology that studies the multidimensional redevelopment (intra and extraphysical) in this planet, the assisted maximecanism involved and its evolutionary effects. Being a scientific sub-field of Assistenciology. (WV)

To study the reurbex, does not mean promoting reurbex

The veteran penta practitioners, starts to envolve more in reurbex

Parareurbanology

REURBEX STUDY OPTICS

01. The first optic, is in loco, that is, in the own extraphysical site where the same is occurring under the coordination of serenissimus. The lucid consciousness can ascertain the reurbex through conscious projection.

02. The other category of investigation of the reurbex is through the reading of its indicators or intraphysical effects.

This second is my way to study parareurbanology

Parallel: Reurbin - Reurbex

Morphothosene of similar conscexes

EXTRAPHYSICAL DIMENIONS
(Mental state of conscience)

After our biological death, we will find similar consciousnesses

Parallel: Reurbin - Reurbex

HOLOTHOSENE MANIFESTATION OF CONSCINS

INTRAPHYSICAL DIMENSION
(buildings, neighbourhoods, cities, ...)

Parallel: Reurbini - Reurbex

The intraphysical and extraphysical forms, from objects to buildings, are creations and reflections of the intracosciential condition of the intraphysical consciousness

**Conscienciometry of the consciences
through the analysis of the environments**

Parallel: Reurbin - Reurbex

ENVIRONMENT

CONSCIOUSNESS

THE ENVIRONMENT INFLUENCES CONSCIOUSNESS AND THIS INTERFACE IN THE ENVIRONMENT.

Movie Example: "What Dreams May Come" [Amor alem da Vida]

When he arrives to rescue:

"... if her reality is yours, there is no turning back"

What would be the Reurbin target environment ?

- Prisons,
- Forts,
- Dungeons and other stigmatized sites where frequent accidents occurred
- Stage of genocide
- House with poltergeist occurrences
- Public places, walls and places of public executions
- ...

In our conscientiological bibliography
these locations are considered "Avoidable"

"The megafocus of reurbex is not defined by intraphysicality"

What is the intermissivist profile to work with this reality?

REURBANIZER PROFILE

- **Sense of Proaxis: intermissivist self-commitment**
- **Group Sense: Maxiproaxis is an evolutionary group**
- **Paradiplomacy: the importance of "the other"**
- **Universalism: non-sectarian, without preconception**
- **Cosmoethical self-abnegation: renunciation of self for all**
- **Unbreakable Will**

REURBANIZER PROFILE

- **Despoliation: "bump any stop"**
- **Openness / flexibility: Knowing to give up to the new**
- **Energy domain**
- **Resilience: high support capacity**
- **Cosmoethical Interassistential Leadership: to be an agglutinator**

REURBANIZER PROFILE

- **Penta Practitioner**
- **Pacifist**
- **Cosmoethical Intent**
- **Engagement**
- **Availability of Care**

Parareurbanology and Penta

Is it possible for an intermissivist to become a re-urbanizer student without the practice of penta?

Parareurbanology and Penta

Penta or personal energetic task promotes the assistance to sick extraphysical consciousnesses of the paratropospheric dimension.

Parareurbanology has a direct connection with the practice of penta, since the basic characteristic of penta, which is the assistance to diseased extraphysical consciousnesses, consequently promotes the sanitation, cleaning or reurbanization of the native paratropospheric environment of these extraphysical consciousnesses.

Pararurbanology and Penta

In daily life, the penta practitioner does the assistance scavenging wherever he goes, promoting a trail cleaning (energetic and / or thosenic) through which he travels, with the consciex baits being assisted during the penta sessions.

Penta = mini-reurbex

Penta Room: portal of connection between the physical dimension and the extraphysical dimension, the practitioner being the epicenter of this interdimensional interaction.

Penta as a prerequisite for installing campus

- **Resident Penta Practitioner.** The installation of a campus launches with resident penta practitioners.
- **Pro-Cognópolis Commission.** Manual of Guidelines for the Installation of Campi, UNICIN, 2007 → main prerequisite the dwelling of penta practitioners in the campus, preferably evolutionary duos.
- **Statistics.** According to the ICGE (2012, p.21) Cognópolis Foz had 247 penta practitioners, or 38% of the total of cognopolitas.

Unbreakable Will

Parareurbanological Expansion Gradient

Proposal of an upward gradient

Subdivided into six sequential steps:

Methodology. Context analysis and indicators on penta and reurbex.

Step 01: Claritask

Hypothesis: A course of conscientiology occurred in an environment of sporadic form, composes the first step of the reurbex.

Cleaning, Rinseout of Holothosene Pressure

Field courses (ECP2 and ECP3) are high impact courses in extraphysical reurbanization. Courses and activities in specific locations

1 CLARITASK (assistential field)

Step 02: Leased Physical Base

(There is still no ownership of the property)

Hypothesis:

Anchoring of the CI in the Intraphysical. More permanent, fixed space.

Frequent meetings and courses, provide greater bail and referral of extraphysical consciousnesses.

Weak point. The room owner alien to conscientiology receives the holothosene pressure relative to the objectives of the CCCI, but has the parasanitary encapsulation promoted by the helpers.

Step 03: Own Physical Base

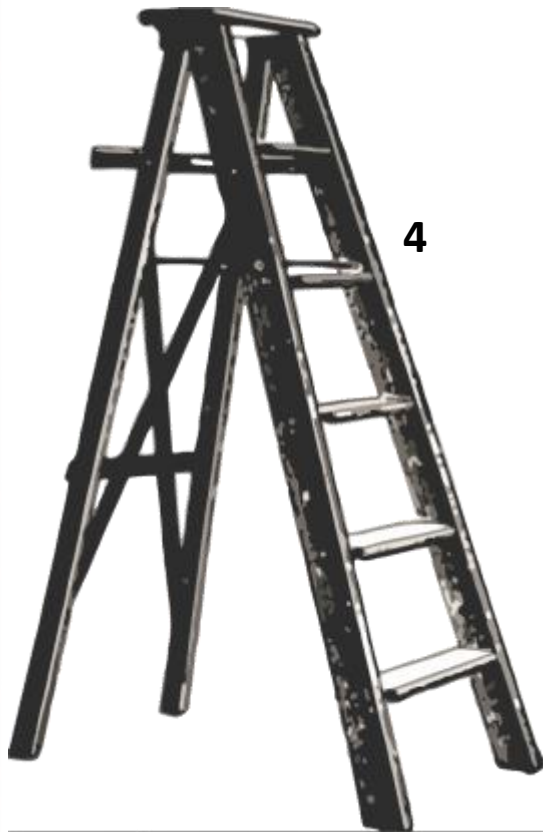

(CI acquires property basis)

- The room is in the name of the CI.
- The pressure and against flow on ex-room owner is eliminated.
- The proper physical basis is the anchoring of the intermissive course in the intraphysical dimension.
- This anchorage, added to the advanced grouping promoted by CI, can be the basis for the expansion and deepening of multidimensional works.
- Penta Praticioners: the fixed physical foundation, own, not subject to eviction is ideal for the development of penta.

Step 04: CI Campus

- Helps place, super-structure for claritask, and reurbex
- Administrative Environment;
- Resident Penta Prationers (housing);
- Laboratories;
- Auditorium for field courses;
- Parapsychic dynamics;
- Holotheca.

The reurbex would be reaching
a considerably higher level.

Step 05: Cognopolis

- Plurality of CIs Campuses. Diversity of Specialties - Consolidated Materpensenes;
- Housing condominiums (nine in Foz),
- Hundreds of resident penta prationers;
- Giga piece of the assistential maximechanism
- Hypothesis: Would a consolidated cognopolis be a prerequisite for a continental assistance promoted by intermissivists?

Step 06: Cognopolis Intercontinental Network

Connecting Researchers.

Hypothesis: Formation of an intercontinental parareurbanological network.

Exchange of Conscientiology specialists physically and virtually;

Greater range of intra and extraphysical consciousnesses on the planet.

What impacts can be anticipated?

Could we have distinct Cognópolis with distinct specialties?

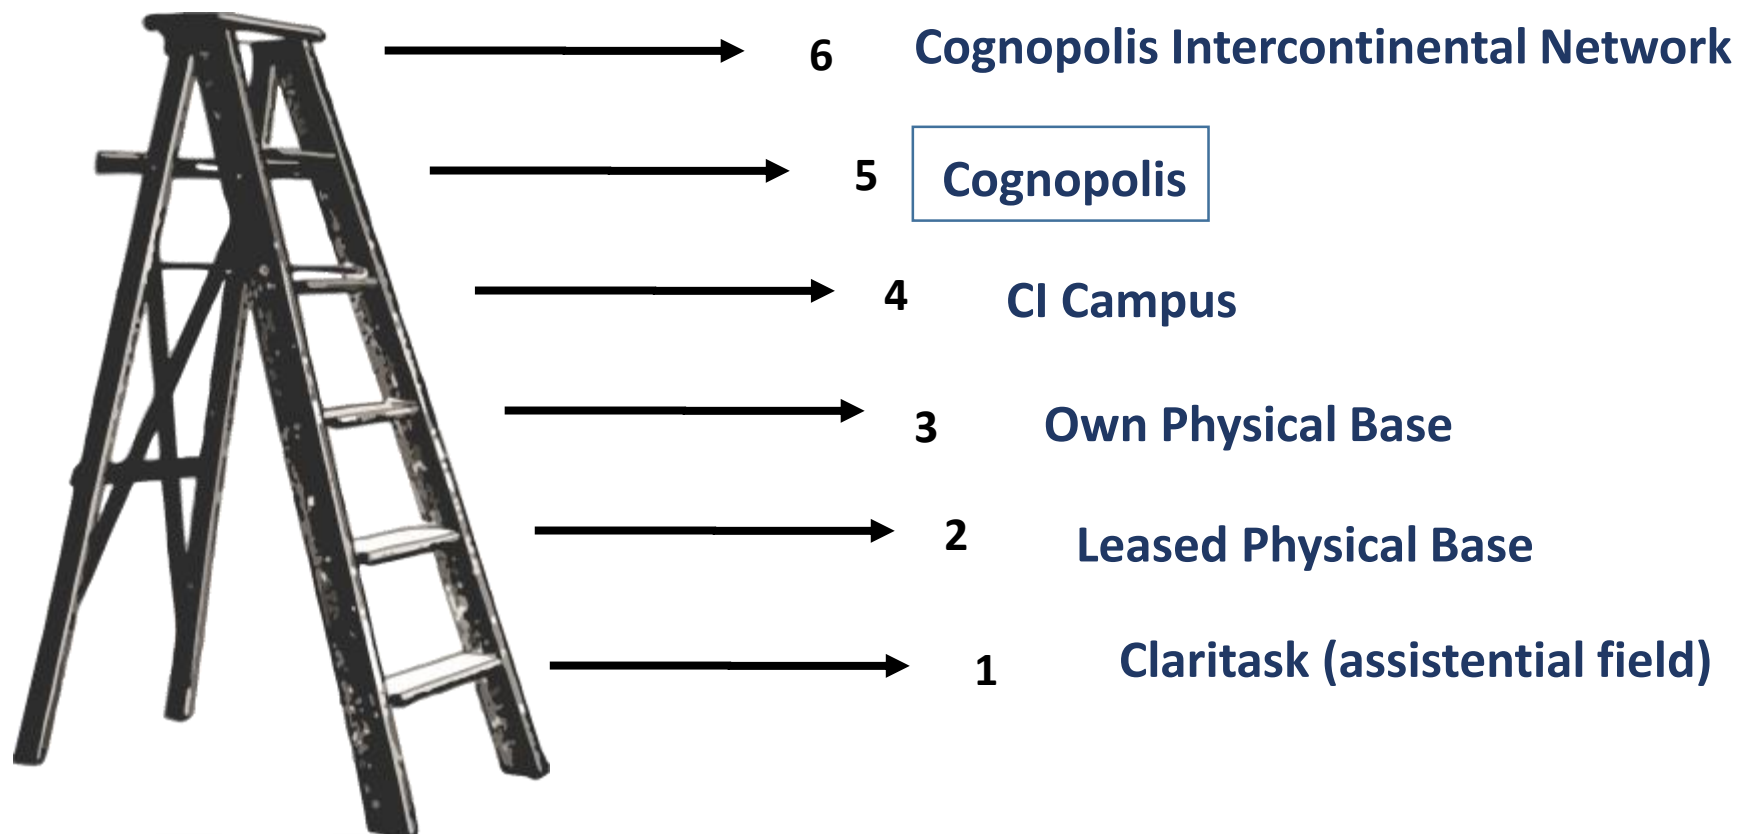

Which homeostatic, nosographic and sustainability indicators would be taken into account for the opening of new countries?

Invisible colleges are independent of physical space, and can connect researchers from all over the world.

6

Pararurbanological Expansion Gradient

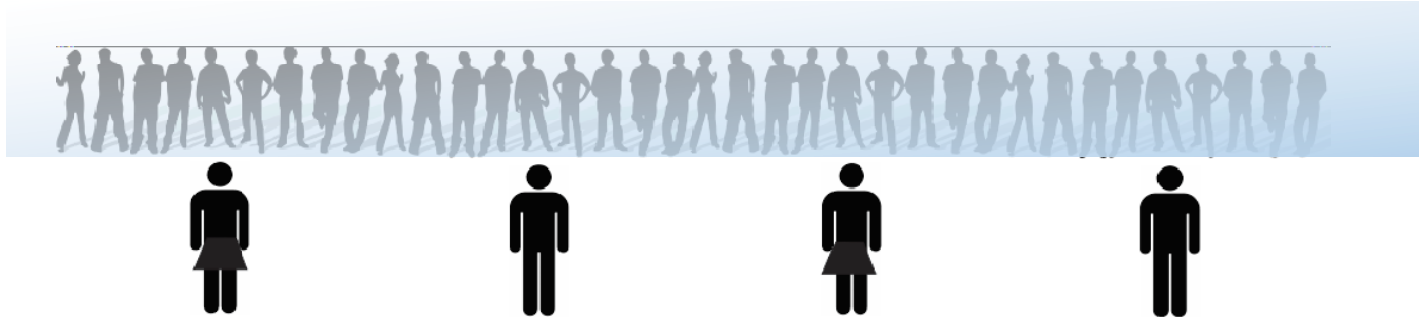

What is the role of a conscientiocentric campus?

To be a Reurbex Maxi-piece

Conscienciocentric Campus Installation

Should campuses have a specialty or be an "embassy" of several CIs?

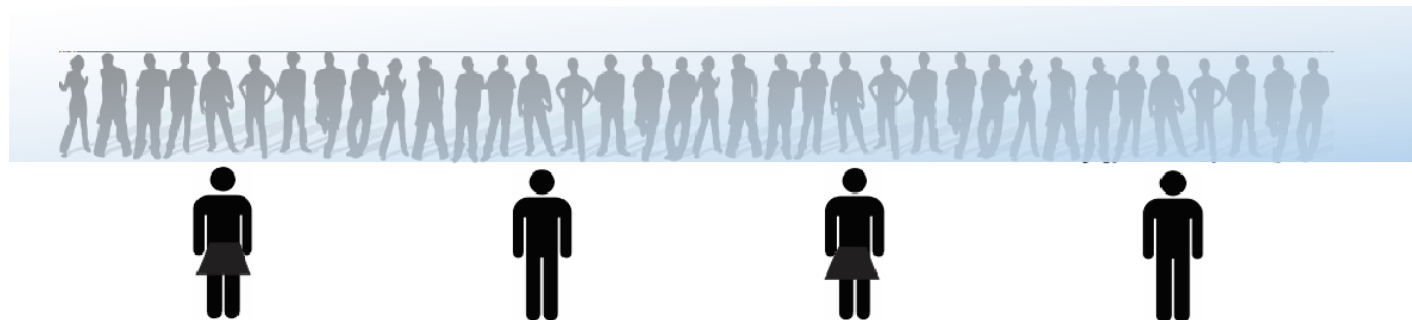

Multidimensional Multiplier Effect Buildings

04 Officials = 36 consciexes

50 direct workers = 450 extraphysical consciousnesses

50 workers + 03 family members = 1800 extraphysical consciousnesses

Multidimensional Multiplier Effect

**COGNOPOLITE TENEPESIST
UNIVERSITY TEACHER**

40 Daily Students = 360 extraphysical consciousnesses

200 Weekly students = 1800 extraphysical consciousnesses

Connecting Researchers.
