

CONSCIENIOLOGY

Is the science that studies the consciousness (the self, ego, intelligence, soul) in an integral way, considering its various bodies, previous lives, the dimensions in which they manifest and the energies they mobilize. In conscientiology, the researcher researches themselves and other consciousnesses utilizing parapsychism –perceptions beyond the 5 basic senses.

COURSES AND PARAPSYCHIC DYNAMICS

Researcher-instructors, CEAEC volunteers, teach several thematic courses related to self-research and the evolution of consciousness.

Please check out: www.ceaec.org.br

Parapsychic Dynamics are practical activities that aim to develop perceptions beyond the 5 senses, without mysticism or dogma.

To participate, please contact CEAEC's reception.
